San Mateo County Alternative Route Plan- DRAFT

June 19, 2007

Page 1

I. OVERVIEW

A. Purpose

The purpose of the Alternative Route Plan is to increase the coordination between Caltrans, CHP, local agency public safety, and local agency public works staff in San Mateo County during an incident when it is desirable to direct traffic off the freeway and onto an alternative route on local streets. These alternative routes were chosen with input by local agencies and seek to contain and/or minimize the impacts of the diverted traffic onto the local street network. The alternative routes use parallel arterial streets that are the best candidates for moving a higher demand of traffic during incidents.

Alternative Routes for the following freeway segments are included in this handbook:

- United States Route 101 (US 101)—from San Francisco County border to Santa Clara County border
- Interstate 280 (I-280)—from San Francisco County border to State Route 92
- Interstate 380 (I-380)—from US 101 to I-280
- State Route 92 (SR-92)—from I-280 to the San Mateo Bridge

This handbook includes the following information to be used in the support of implementation of alternative routes:

- Alternative Route Implementation Checklist
- Local Agency Public Safety and Public Works Contacts
- Emergency Operation Center (EOC) locations
- Freeway Changeable Message Signs (CMS) locations
- Alternative Route Plans

B. Implementing an Alternative Route

1. Alternative Route Elements

Alternative routes typically consist of several components: freeway off-ramp, local street connector to the parallel arterial street, parallel arterial street, local street connector from the parallel arterial street and the freeway on-ramp and freeway on-ramp. The following elements are used to support the implementation of alternative routes along these components. Although some of these elements do not currently exist along the alternative routes, they will be part of the overall system deployment at some time in the future.

Fixed CCTV Cameras (future)—Monitors traffic flow and conditions at key signalized intersections along the alternative route.

PTZ Cameras (future)—Monitors traffic flow and conditions along the alternative route.

Electronic trailblazer signs (future)—Provides route guidance for the diverted freeway traffic along the alternative route. Also directs local street traffic away from entering the impacted freeway section.

Static detour signs—Provides route guidance for the diverted freeway traffic along the alternative route and directs local street traffic away from entering the impacted freeway section.

On-Ramp Metering (future)—Adjusts on-ramp flow rates upstream and downstream from the incident to facilitate changes in traffic demand due to the incident. Flow rate for on-ramps upstream of the freeway incident are more restrictive, while flow rate for on-ramps at the end of diversion routes are less restrictive (or turned off) to help the diverted traffic clear local streets.

Traffic signal flush plans (future)—Provides increased throughput capacity for local streets by adjusting the signal timing to provide extended green times along the parallel arterial street and the local street connectors to and from the freeway to move greater amounts of traffic.

Police Deployment—Provides direction and enforcement of diversion at key decision points along the alternative route. This role may also be fulfilled by other public staff (e.g. public works.).

Freeway Changeable Message Signs (CMS)—Provides incident and route guidance information upstream from the incident. These devices are controlled by Caltrans and are an integral part of disseminating traffic and incident information to drivers on the freeway. A map showing relevant CMS signs is included in Section V Freeway Changeable Message Signs for reference only.

2. Communications Flow and Local Agency Responsibilities

The following graphic illustrates the communications flows between Caltrans, CHP, local agency public safety and local agency public works in implementing the alternative routes in response to an incident on the freeway. This flow of information is important to understand as incident management and response is coordinated between stakeholders.

Table 1 outlines the general tasks that may occur on local streets during the implementation of an alternative route. The local agency public works department will likely participate in these activities during an incident as traffic is routed along the local street. Additional details on these tasks are covered in Section II. ALTERNATIVE ROUTE IMPLEMENTATION CHECKLIST.

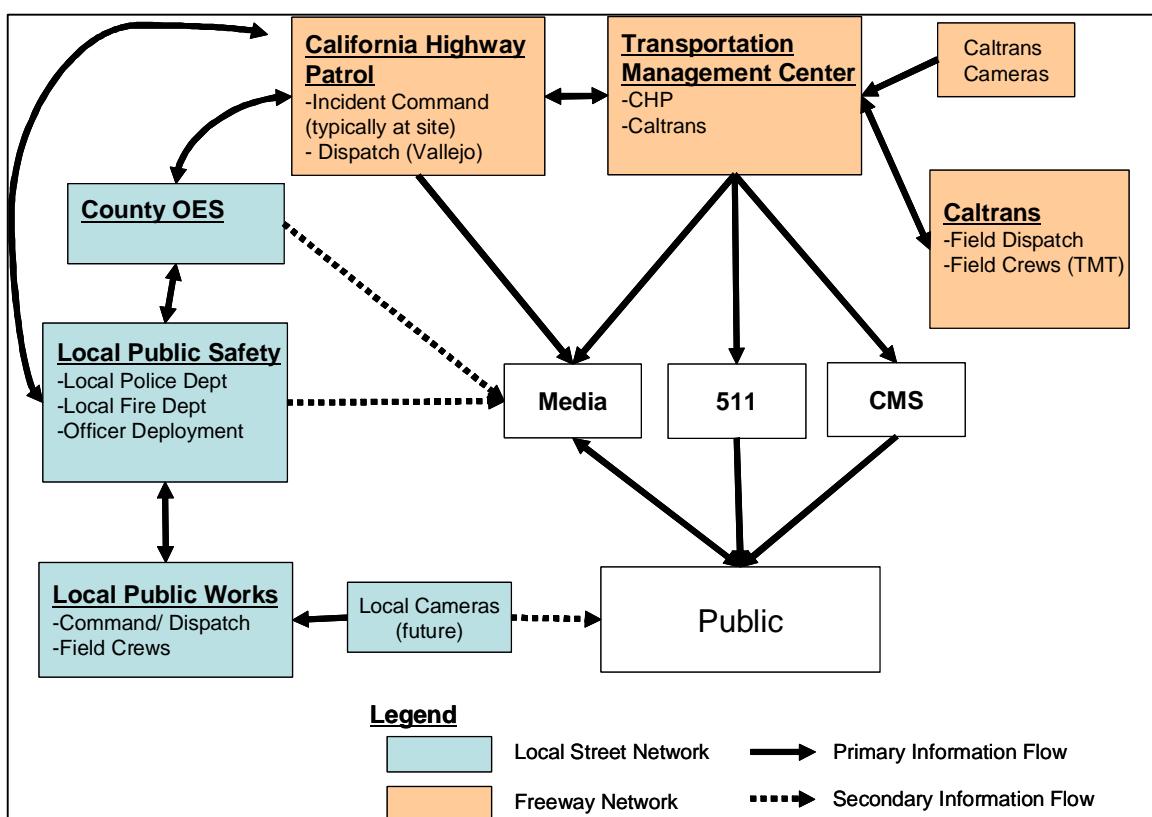

TABLE 1: Local Public Works Alternative Route Implementation Tasks

Task
Field check alternative routes
Close local streets and/or freeway-on ramps
Install static detour signs
Direct traffic on local streets
Monitor traffic flow and conditions and provide feedback through field crew and officer deployments
Activate trailblazer signs (future)
Adjust signal timing / Activate flush plans (future)
Monitor traffic flow and conditions using field cameras (future)
Monitor CHP reports regarding status of incident (including when incident is clear). Coordinate actions with CHP and local agency public safety

II. ALTERNATIVE ROUTE IMPLEMENTATION CHECKLIST

The following checklist provides details for the general tasks outlined in Table 1. This checklist focuses on the implementation of alternative routes and does not include items relating to emergency response, staging areas, incident severity level determination, etc.

Task: Field check alternative routes
<ul style="list-style-type: none"> • Is there any construction activity along the route that impacts lane capacity? • Are all traffic signals along the route operational? •
Task: Close local streets and/or freeway on-ramps
<ul style="list-style-type: none"> • Which ramps or local streets should be closed? • Is there a detour path for the local traffic? How is this communicated to the drivers? • What is the trigger (e.g., procedure or time) to re-open the local streets or freeway on-ramps? •
Task: Install static detour signs
<ul style="list-style-type: none"> • At what locations should the detour signs be installed? In what order should the detour signs be installed? • What signs should be included at each location? Have you considered both diversion traffic exiting the freeway and local traffic going to the freeway? • Is there a trigger (e.g., procedure or time) where the signs need to be taken down? •
Task: Direct traffic on local streets
<ul style="list-style-type: none"> • At what locations and directions should personnel be placed to direct traffic? In what order should the deployment take place? • What is the trigger (e.g., procedure or time) to relieve personnel deployments? • What is the trigger (e.g., procedure or time) to end the personnel deployments? • •
Task: Monitor traffic flow and conditions and provide feedback through field crew and officer deployments
<ul style="list-style-type: none"> • At what locations are conditions being monitored? • What information should the field personnel be looking for? • Who do they provide this information to? • How do they provide this information? • What is the trigger where monitoring is no longer necessary? •
Task: Activate trailblazer signs (future)
<ul style="list-style-type: none"> • Are their trailblazer signs along the alternate route? • Which trailblazers (location, direction, message) should be activated? • What signs should be included at each location? Have you considered both diversion traffic exiting the freeway and local traffic going to the freeway? • What is the trigger (e.g., procedure or time) where the signs need to be taken down? •

**Task: Adjust signal timing/ Activate flush plans (future)**

- Is there communications to the traffic signals along the route?
- Are there pre-programed flush plans along the route?
- What is the trigger for signal operations to return to normal?
-

Task: Monitor traffic flow and conditions using field cameras (future)

- At what locations are conditions being monitored?
- Who to public works contact to provide monitoring information?
- What is the trigger where monitoring is no longer necessary?
-

Task: Monitor CHP reports regarding status of incident (including when incident is clear). Coordinate actions with CHP and local agency public safety

- Are the regularly scheduled updates coming from CHP on the incident, or will local public safety need to regularly check in?
- What actions are CHP and local agency public safety taking to manage incident and traffic? What actions should local agency public works take to assist in the response?
- Note long until the incident will be declared clear.
-

III. SAN MATEO COUNTY ALT. ROUTES CONTACT LIST

VI. ALTERNATIVE ROUTES

A. Organization

The following Alternative Route Plans are organized by the State Route, travel direction, and the exit number where the alternative route begins. For example, Plan No. 101-S-426 would indicate the alternative route plan for US 101, in the southbound direction, starting at exit 426.

If there is more than one alternative route available, then the alternative route plan number is supplemented by the alternative route option number. For example, Plan No. 101-S-429A-2 would indicate option #2 for the alternative route for southbound US 101 starting at exit 426. If only one alternative route option is available, no option number is included in the plan number.

The overall list of Alternative Routes is arranged as follows:

- SB US 101 from north to south
- NB US 101 from south to north
- SB I-280 from north to south
- SB I-280 from south to north
- WB I-380 from east to west
- EB I-380 from west to east
- WB SR 92 from east to west
- EB SR 92 from west to east

B. Alternative routes by Incident Location

The following table provides a quick reference between the location of the incident and the nearest Alternative Route plan number. In some instances, due to the severity of the incident and/or amount of queue build-up, it may be advisable to implement the alternative route further upstream.

Incident Location	Plan Number
SB 101 between Beatty Rd and Lagoon Wy	<u>101-S-429A-1</u> <u>101-S-429A-2</u>
SB 101 between Lagoon Wy and Oyster Point Blvd	<u>101-S-426-1</u>
SB 101 between Oyster Point Blvd and Produce Ave	<u>101-S-425B-1</u> <u>101-S-425B-2</u>
SB 101 between Grand Ave/Miller Ave and Produce Ave	<u>101-S-425A-1</u>
SB 101 between Grand Ave/Miller Ave and N. Access Rd	<u>101-S-425A-2</u>
SB 101 between WB Interstate 380 and Millbrae Ave	<u>101-S-423B-1</u>
SB 101 between Millbrae Ave and Broadway	<u>101-S-421-1</u> <u>101-S-421-2</u>
SB 101 between Broadway and Popular Ave	<u>101-S-419B-1</u> <u>101-S-419B-2</u>
SB 101 between Poplar Ave and E. 14th	<u>101-S-417-1</u>
SB 101 between 3rd Ave and SB 101/ EB 92	<u>101-S-416-1</u>

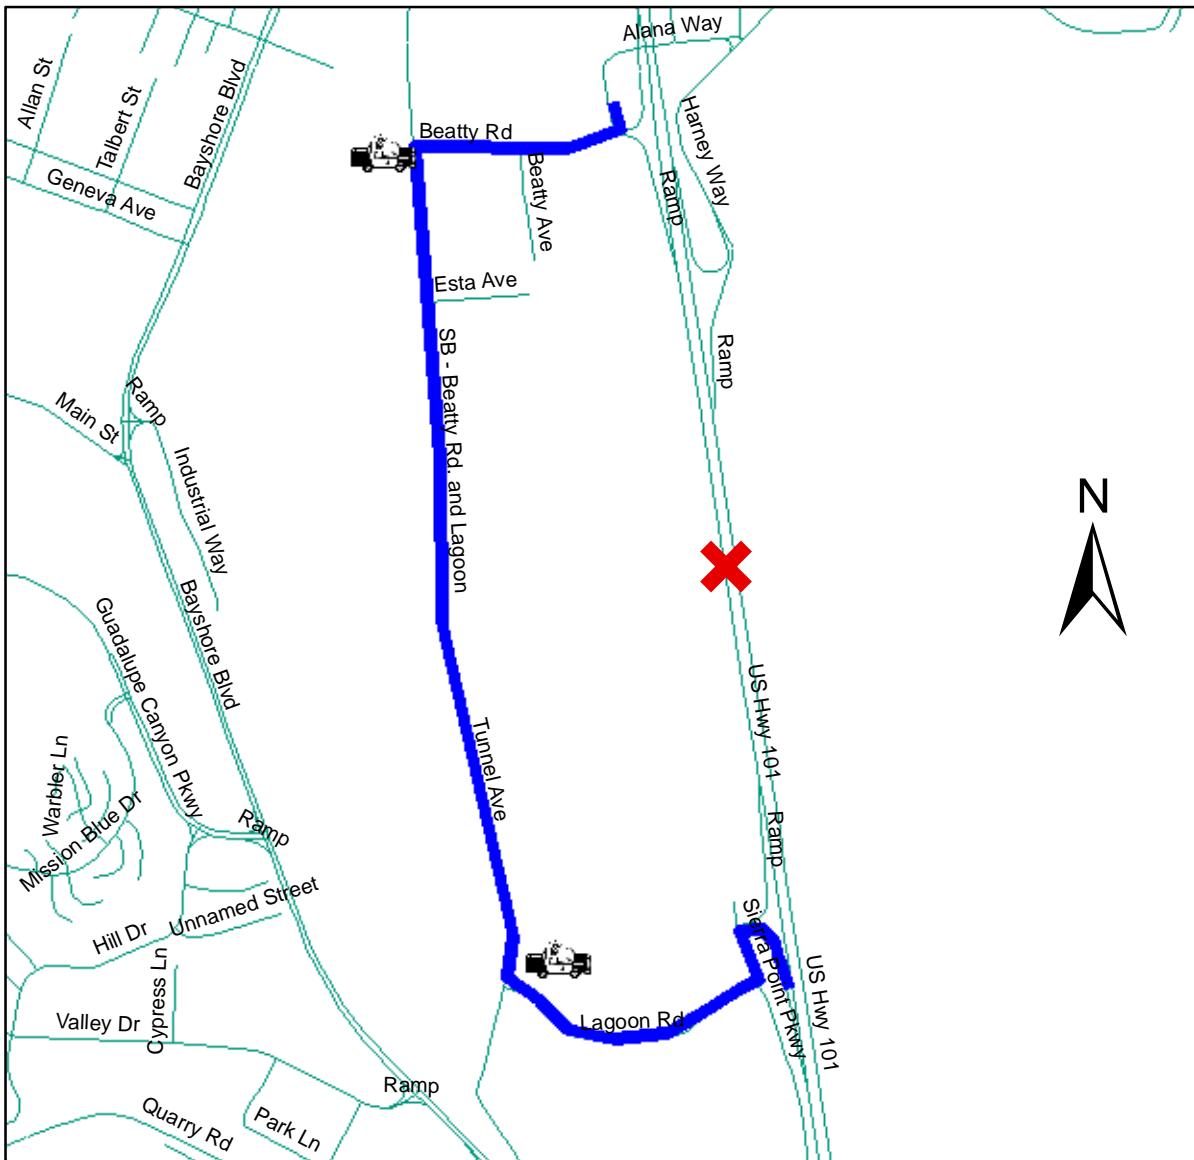

Incident Location	Plan Number
SB 101 between WB State Route 92 and Hillsdale Blvd.	101-S-414B-1
SB 101 between Hillsdale Blvd and Ralston Ave	101-S-414A-1
